RESTORING THE ROSE GARDEN
Victorian or not?

ENGELMANN OAKS
Planning for the future

GROW!
2012 Garden Festival
WINDS OF CHANGE
A Strategic Plan for the Los Angeles County Arboretum

With gusts up to 80 mph, the winds of December 1st topped scores of trees, many of which were among the first generation planted at the Arboretum. Thanks to generous community support (please see page 6 for opportunities to donate), we now begin the largest tree planting campaign in decades, and envision the wonderful new specimens that will delight our children and grandchildren. Indeed, the work of an arboretum—growing remarkable trees—requires always looking to the future.

Importantly, we were looking ahead before the storm. Over the past year, we reached out to 1,800 people—members, volunteers, students, teachers, and many others—asking their help in shaping the Arboretum’s future through a new strategic plan. The end result is a shared vision for enhancing the three dimensions of the Arboretum that are most important to our community:

THE ARBORETUM EXPERIENCE
You let us know that the Arboretum must grow in providing memorable experiences of discovery and improved amenities for the over 300,000 who visit each year. We are committed to enriching your experience with new ways to see the Arboretum, from new adventure tours to smart phone apps. With 15,000 students coming each year, increased support for schools is another goal. Also look for newly designed maps and signs for finding your way, and additional places to sit, relax and enjoy.

ENVIRONMENTAL STEWARDSHIP
Water conservation, energy efficiency, and sustainable practices in our everyday lives are priorities for the Arboretum and all of Los Angeles. It will take several years, but the Arboretum will update its mid-20th Century irrigation infrastructure. We will reduce our turf and demonstrate water wise and attractive lawn alternatives. We will continue to offer the latest information for home gardeners and landscape professionals focused on living in greater harmony with the Southern California environment.

CELEBRATING AND PRESERVING OUR HERITAGE
The Arboretum is a place of history told through landmark structures and venerable trees and landscapes. Most remarkable is the story of the Baldwin Ranch: home to estate gardens, expansive farming, and some of the finest horses of the day. In addition to providing increased care for our 19th century buildings, we will share our history in exciting new ways, from hand-held technologies to expanded tours with our expert docents.

For more information on the Arboretum’s strategic plan, we invite you to visit our website www.arboretum.org and click “About.”

So much is already underway. In these pages you will learn of restoration of our Rose Garden, stewardship management for our Engelmann oaks, and a new Garden for All Seasons. And of course, there will be many opportunities for you to participate in our progress. In so doing, you will ensure a very bright future for the Los Angeles County Arboretum. I thank you for your support.

—Richard Schulhof, CEO
4 GROW!
A Garden Festival to celebrate spring.

6 AFTER THE STORM
Planning for a new generation of trees.

7 LIBRARY
A makeover for the treasured resource.

8 KIDS & FAMILY
Let’s Move! a program to get us active in the garden.

10 ROSE GARDEN
Close, but not quite vintage Victorian.

COLLECTIONS: ENGELMANN OAKS
An example of environmental stewardship.

TEMPORARY GARDEN RESTORATION CLOSURES
The Arboretum’s ongoing preservation and restoration projects will result in the temporary closures of the Rose Garden, Queen Anne Cottage, Coach Barn, Adobe, Bauer Fountain and McFie Pool. The Rose Garden reopens in late January.

This is a publication of the Los Angeles Arboretum Foundation. The Los Angeles County Arboretum and Botanic Garden is governed through a private/public collaboration between the Foundation and the County of Los Angeles through its Parks and Recreation Department.

On the cover: Rose Garden. Photo by Frank McDonough
The Garden Festival is a great way to celebrate the spring gardening season with one-stop shopping and entertainment. Grow your Arboretum experience and explorations with a weekend of festivities that will include:

- Introduction of the newly designed Garden for All Seasons
- Exhibit of local sculptors and installation artists
- Sale of unique and exotic plants
- Marketplace of garden accessories and tools
- Garden Chats, demonstrations and meet the experts
- Let’s Move! family and children’s hands-on activities
- Entertainment
- Food trucks and specialty vendors

SPECIAL FRIDAY EVENING HOURS
Friday, May 4, 5–8pm
Members: $5 adults, $1 children;
Nonmembers: $10 adults, $2 children
Experience the Arboretum in a different light with a first opportunity for purchase of specialty plants and marketplace offerings.

GROW! A GARDEN FESTIVAL
Saturday-Sunday, May 5-6; 9am-4:30pm; 8am early entry for members only
Members free; Nonmembers, $8 for adults; $6 seniors and full-time students; $3 children 5-12; Details will soon be available at www.arboretum.org.

Bring your own wagon, carts and wheelbarrows for all your purchases.

DESIGNING A GARDEN TO GROW FOR ALL SEASONS

Amy Korn and Matt Randolph of kornrandolph, inc. landscape architects in Pasadena designed the new Garden for All Seasons as a demonstration site for small scale, water-efficient cultivation of vegetables and fruits. When the garden opens May 4, there will be a state-of-the-art water harvesting system, an orchard, grape arbors and even a chicken coop. Known for combining ecology, art and social sensibility, Matt, a landscape architect, and Amy, principal designer, have a garden design portfolio that includes the Getty Villa in Malibu, The Huntington Library’s Desert Garden master plan in San Marino, the Rancho Los Alamitos restoration in Long Beach, and Caltech’s Linde+Robinson Laboratory for Global Environmental Science. The husband and wife team discuss how they created a design that is responsive to both the Arboretum site and the people who experience it.

If you had only three words to describe this garden, what would they be in order of importance? Amy: Inspiring, productive and thoughtful.

Would you elaborate on each of the three descriptors and describe where in the garden we’ll see examples of each of the concepts? Amy: The garden is designed to be an inspiration to home owners with gardens of all sizes on how they may adapt small to large portions of their property to include edible plants and energy and water-efficient systems.

A small garden can be productive in the ways of water harvesting and reuse, solar energy and food-producing plant material.

A technology-based, efficient and economical garden can still be designed in a thoughtful and aesthetic way.
Matt, you have described the garden as an update of old-fashioned water harvesting and conservation techniques. What do you mean by that? Matt: The idea of water conservation, collection and reuse has been around for thousands of years. We are utilizing modern technology such as solar panels, solar pumps, efficient sprinklers, and smart controls to maximize the garden’s productivity.

Is this garden designed to have teaching moments for both children and adults? Amy: Yes. Almost every location in the garden holds an opportunity to teach or learn from by individual observation or small groups, adults and children alike. There is an improved outdoor classroom located adjacent to the peafowl enclosure.

What are those lessons? Amy: We can produce healthy foods in small spaces efficiently and by varied and creative design solutions. As an example, an idyllic aquatic pond located in the garden demonstrates that a water feature does not have to waste potable water. As designed for the Garden for All Seasons, this feature collects and holds harvested water then re-circulates it through the bubbling pond, which aerates and cleanses the water through the bubbler and aquatic plant material before refilling the cistern connected to the system. This eliminates the need to add chemicals to the cistern to keep the water clean. Some of this water is used to irrigate the edible material grown in the peafowl enclosure.

How do the chickens fit in? Matt: Chickens contribute to the sustainable aspects of a food production garden by providing food (eggs), fertilizer as well as entertainment.

How do you protect the plants from foraging peafowl? Amy: Plants that peafowl tend to harm will be grown in raised beds in the peafowl enclosure. Plants in the enclosure will be selected by the Arboretum staff to include herbs, fruit trees and many other producing species that are unappealing to peafowl.

Complete this sentence: We consider our garden successful if visitors leave with... Amy: A desire to implement any number of practices, systems, materials and/or design solutions on their own.
The grand vistas at the Arboretum look a little different since the worst windstorm in decades ripped through the garden on December 1st. Where tree canopies once created vast pools of shade, sunlight now bathes the areas—almost as if Mother Nature is putting a spotlight on all the empty spaces where trees and plants once thrived.

“The tragedy was the wind,” observed Timothy Phillips, the Arboretum’s Superintendent. “The winds have come and gone.”

A silver lining can be found in all of this. “We can envision the Arboretum of the future,” CEO Richard Schulhof said. “Now is the time to enhance the beauty of our gardens and provide great new moments of learning and discovery.”

The single largest planting campaign in the Arboretum’s history is needed to restore the garden. The winds destroyed 326 trees and damaged more than 700 other specimens, which now need restorative pruning. “We have found that there is a lot of variation as far as what has survived and what hasn’t survived,” said James E. Henrich, Curator of Living Collections at the Arboretum. “It’s definitely not a case of the exotics being the weaker species.”

The 10-acre Australian section was hardest hit with 40 trees lost. The Prehistoric Forest, fig collection and Grace Kallam Perennial Garden all sustained considerable damage. A 140-year-old blue gum eucalyptus, one of three in the historic area, is gone. The Engelmann oaks, however, survived with relatively little damage.

While palm fronds and other tree and plant debris rained down into the lake and areas around the historic structures, the Queen Anne Cottage, Hugo Reid Adobe, kiys and Santa Anita Depot all came through unscathed by the winds. Only the Coach Barn lost a few roof shingles, according to Mitchell Hearns Bishop, Curator of Historical Collections at the Arboretum.

Thanks to workers from multiple public agencies, as well as dedicated Arboretum staff and volunteers, the grounds reopened to visitors by late December. The Gift Shop, Arboretum Library and Peacock Café remained open during the cleanup.

“We are deeply grateful to the many members and friends of the Arboretum who, within days after the storm, began contributing toward planting the next generation of trees and plants that will ensure a magnificent Arboretum for years to come,” said CEO Schulhof. “We invite the entire community to participate by making a gift to the Arboretum Tree Fund.”

A NEW GENERATION OF TREES
Clockwise from top left: Less than 24 hours after the windstorm, the Arboretum staff was assessing the damage and starting the cleanup.
Top: Jill Morganelli, left, and Celina Nacpil.
Taking a break: David Okihara, Joe Valenzuela, Theresa R Ichau, Glenn Klevdal, Angela Carranza, Irma Reddig and Rafael Cano Jr.
Below left: Volunteers Nicholas Coughlin, Bette Shotwell and Marsha Keene were among the many volunteers who helped to clear the grounds so the Arboretum could reopen.

TREE FUND
If you would like to contribute to the Arboretum Tree Fund, visit www.arboretum.org and click “Support,” or mail a check payable to the Los Angeles Arboretum Foundation. Please add “Tree Fund” on your donation. Thank you!

Los Angeles Arboretum Foundation
301 N. Baldwin Ave.
Arcadia, CA 91007
Good news for the 122,000 who use Arboretum Library resources each year! The building will undergo a $1.25 million renovation that will add a convivial reading room with open book stacks, modern work spaces for volunteers and the public, a children’s area, exhibit space, state-of-the-art technologies, and much more.

The improvements, funded by Proposition U money, will mean that the library will temporarily relocate to the Bamboo Room when the renovation begins. So we’ll be packing up the collection of over 20,000 books, 1,000 periodical titles, plant and seed catalogs, photographs and slide collections, and ephemera. Fortunately we won’t have to move the rare books because the Good Family Foundation already helped create that space.

Plans call for creating a visual and physical connection between the building and the surrounding landscape by adding windows and an entrance on the west. This will integrate the library into the existing gardens and patio.

Inside, the renovation will improve all the work spaces and integrate library reference and botanical consultation into the public space. There will be a leisure reading area, Wi-Fi, computer terminals, an area for quiet study, a children’s area, space for exhibits and a book sales area. In addition, there will be other updates in security, electrical and plumbing.

With these changes, the library will be able to better fulfill its mission to collect, manage and make its materials accessible. The changes will also better enable us to educate and engage the Southern California community, Arboretum staff and volunteers with information about plants as well as local history related to the Arboretum and its land. 

—Susan Eubank is Arboretum Librarian.

THE LIBRARY IS POWERED BY VOLUNTEERS

We are so grateful to the wonderful group of library volunteers. They help with all the tasks behind the scenes that make a library. Pam Wolken and Bill Ramsey work with the magazines. Carl Nicola does all book repairs. Rayma Harrison, a retired Caltech librarian, catalogs books into our online catalog and untangles the cataloging “cans of worms” brilliantly. Christine Hsiao does interlibrary loans, all the tricky book labeling challenges, and is the retired champion processor, meaning she has put more property stamps, spine labels and date due slips in the new books and covered more books with plastic jackets than any other volunteer. Linda Donato, Harriett Furin, LaVonne Barnes, and Jeanette Erdman have taken up that torch to keep the processing moving.

Mary Jane Macy and Marge Hullinger generally help with resorting the children books, shifting the main book stacks, shelving, sorting piles of ephemera, comparing donations to the collection, etc. Margaret Byrne is our used book specialist and prices all the surplus materials. Paul Martin and Elisabeth Eubank volunteer at our special events.

We also are privileged to have a rotating group of new library professionals. Our current group, Thomas Dickey, Kristin Abraham, Tanya Koukeyan, Daniel Blitz and Ashley Sparks are honing their skills to serve libraries in the future. Their help keeps the library open six days a week, Tuesday-Sunday. With this list you can get a glimmer of all the activity that makes a library.
GOING GREEN TOGETHER!
LOS ANGELES ENVIRONMENTAL EDUCATION FAIR

Saturday, March 10; 9am – 4pm
Free with admission; members free

Children, families and educators all are invited to celebrate nature with a day of activities and workshops. You will learn how to help make the world a little greener! We’ll have live entertainment, music, exhibits, food, plus:

- Urban homestead workshops on fruit tree grafting, home composting, container gardening
- Nature Quest and Gardeners’ Workout to get moving outdoors
- Jane Goodall’s Roots & Shoots annual Celebration of Service
- Special appearances by Busy Buzzy Bee who loves to read; Hoppy the Grasshopper, the bouncy bug who loves to move, and Dot the Ladybug, a well-mannered charmer.

For more information head to www.laef.org.

FAMILY BIRD WALKS
First Saturday of each month; 8am; Meet at main entrance
Free with admission; members free

The walks are open to all ages (children must be accompanied by an adult) and all levels of bird knowledge. Bring your binoculars, comfortable walking shoes, and join our experienced birder and naturalist for a fun morning of finding and watching our fine-feathered friends.

LET’S GET MOVING!

Whether dancing with drums, hopping like a kangaroo along a trail or scouring the grounds for cool stuff, kids are getting a good workout with family programs specially designed for Let’s Move! at the Arboretum. Across the country families are getting involved in Let’s Move!, First Lady Michelle Obama’s national initiative to get children active and to eat healthily.

Let’s Move! was introduced to children with dancing and drumming at the Arboretum’s annual meeting in September. Now you’ll see families with maps in hand, following the Serpent Trail through the Australian plant collection and looking for animals—animal drawings on rocks—to mimic their movements. Other special hikes include The Hunt for Cool Stuff and Extreme Arboretum. Maps are available at www.arboretum.org, click “Kids & Families.”

To promote healthy eating, we feature a seasonal vegetable or fruit with recipes online. The Peacock Café has added a special menu for children. Parents can attend classes to learn how to grow their own healthy food at home.

More Let’s Move! activities are coming. Mark your calendar for these events:

**LET’S MOVE! ADVENTURE HUNTS**
Saturday, January 14

**LET’S MOVE! ACTIVITIES AT LOS ANGELES ENVIRONMENTAL EDUCATION FAIR**
Saturday, March 10

**LET’S MOVE! EGG HUNTS AND SCRAMBLES**
Saturday, April 7

**KIDS’ KORNER AT GROW! A GARDEN FESTIVAL**
Saturday -Sunday, May 5 – 6
SUMMER NATURE CAMP BEGINS JUNE 11—SIGN UP NOW!

Children ages 5 to 10 always enjoy summer days at the Arboretum. The one-week camps, Monday through Friday, are full of adventure, discovery and fun.

WELLS FARGO SUPPORTS OUR SCHOOL PROGRAMS

We express our great appreciation to Wells Fargo for generously supporting many of the over 15,000 students visiting the Arboretum each year. The recent Wells Fargo grant will support transportation costs for classrooms that lack funding for field trips. It also enables Arboretum educators to provide schools with new learning activities to enhance their visit. We thank Wells Fargo for helping kids from across greater Los Angeles discover the wonders of the Arboretum!
IN THE ROSE GARDEN

What was Edward Huntsman-Trout thinking?

Part of the popularity and success of the Victorian Rose Garden is in the simple fact that many visitors assume that it is, indeed, a garden from the 1880s. It is not. Landscape architect Edward Huntsman-Trout designed the garden in the early to mid-50s and it appears to have been finished in 1960.

His drawing for the garden is marked with three dates, “1-27-55,” “2-21-55” and “3-12-60.” He was known for maintaining control of his projects from beginning to end and his persistence is evident since it took at least three years to bring the rose project to completion. He titled the drawing “Old Fashioned Rose Garden,” the name Victorian Rose Garden was applied later.

The design has a number of interesting features, which were never built. It shows a bird bath at either end on the paving in front of the exedras, and a kind of pagoda or gazebo in the very center with a gazing globe. The choice of a gazing globe is interesting. In folklore the globe was believed to avert evil or bad luck and deter witches. On a more pedestrian note, the globe’s reflective surface mirrors its surroundings and also attracts birds, which must have been in Huntsman-Trout’s mind since he also included the two birdbaths. Possibly he had hummingbirds in mind since they are so much a part of the Arboretum’s gardens.

The landscape architect was particularly known for his sensitivity to the site he was working with, in this case the historical core. East of the Rose Garden is a view of the historic Hugo Reid Adobe presenting the Rancho Period. To the west is the attractive backdrop of the Coach Barn. Huntsman-Trout was well aware of these surroundings as he noted on the drawing, “Roses: at East end plant roses of the Hugo Reid Era—1840; at West end plant roses of Lucky Baldwin Era—1880.” Another note stated, “trellis & arbor detail to be simple ‘Victorian’ to be in keeping with styled Baldwin Coach Barn.”

Huntsman-Trout previously had designed the gardens around the restored adobe, the Queen Anne Cottage and barn and the Herb Garden across from the barn. He was creating an overall layout for the historic area that would have coherence for the visitor, moving from the Rancho Period around the adobe with its plantings of California natives, an orchard and a walled compound. This transitioned into a Victorian strolling garden around the
Edward Huntsman-Trout

The landscape architect was born in Ontario, Canada in 1889. His parents died when he was a child and he was raised by his aunt and uncle, Edward and Jenny Trout. Born as Edward Trout Huntsman, he inverted and hyphenated his name. The family moved to Los Angeles where he graduated from Hollywood High School. He earned a Bachelor’s degree in botany from the University of California, Berkeley. He studied landscape architecture at Harvard University and then worked for a number of prominent firms in the East Coast and Midwest. When his aunt became ill, he returned to Los Angeles where he worked for the Beverly Hills Nursery before starting his own practice as a landscape architect in the 1920s. His work in collaboration with the architect Gordon Kauffman is well known and includes Scripps College in Claremont as well as an estate for the movie director Thomas Ince, the gardens of Bullocks Wilshire and many other prominent commissions in the 1920s and 30s. Huntsman-Trout’s influence on the Arboretum is profound. He worked with artist Millard Sheets on the Bauer Fountain and McFie Pool. He also designed the Arboretum’s Herb Garden and the gardens around the Hugo Reid Adobe, Queen Anne Cottage and Coach Barn when they were restored in the early 1960s. He died in 1974.

—M.H.B.
The Engelmann oak grove on Tallac Knoll is home for most of the 225 Quercus engelmannii found on the grounds of the Arboretum. These native Southern California oaks, purportedly the largest extant population in Los Angeles County, are not replacing themselves so we have implemented an aggressive program to preserve this majestic oak for future generations.

Fossil evidence indicates the geographical distribution of the trees to have been from the coast of California east to Arizona, south to northern Mexico and west to Baja California Norte. Aridification that formed the Sonoran and Mojave deserts caused the range to shrink from east to west. Today, the population distribution in California is restricted to the Black Mountains of San Diego County, the Santa Rosa Plateau of Riverside County, Orange County and Los Angeles County.
Natural regeneration has been observed to be poor within most Engelmann oak populations. No conclusive reason is known but it seems to coincide with the introduction of grazing from sheep and cattle by early European settlers. Livestock compact soil and their browsing habits have a considerable negative impact on acorn survival (both fallen and on the tree), as well as on lower tree canopies. Another detriment to the overall tree population is residential and commercial development by humans.

Successful regeneration of the Engelmann oak, often called the Pasadena oak or mesa oak, ultimately relies on three critical issues: acorn production, acorn germination and seedling/sapling establishment.

Acorn production on Tallac Knoll was extremely bountiful in 2010 and winter precipitation was nearly double the average annual rate, resulting in thousands of naturally germinating acorns under the canopy of our grove.

Engelmann oak acorns don’t need to be buried in soil to germinate. When germinating, the embryonic root and shoot emerge out of the acorn and deeply into the soil which may make it well adapted to exposed habitats and bare ground. This unusual germination mechanism does not occur in coast live oak but does occur in other white oaks.

Germination generally occurs in early winter. The greatest percentage of germination occurs within the shade of parent or nurse-parent trees—as high as 75%. The remaining acorns germinate in half-day shade at or just outside tree drip lines. They typically don’t germinate more than 1 meter from the drip lines where the soil water content is lower. Seedlings require some amount of sunlight for long-term survival and this need increases with sapling age. Interestingly, Engelmann oak acorns have a higher tolerance to moisture stress during germination than do coast live oak acorns.

On Tallac Knoll, about 3,600 irrigation flags document the locations of naturally occurring seedlings. Selected seedlings will be caged and given special care to aid their long-term establishment as a replacement generation. In addition, nearly 1,200 acorns were harvested from our trees and planted in the nursery to provide a supplemental seedling population that will be planted out this winter.

In addition, the weedy understory will ultimately be replaced with native species to create a more natural ecosystem.

The Engelmann oak grove is one of the highlights of the Arboretum. Plant enthusiasts planning a visit should make an effort to include this naturally occurring population in their tour, especially during winter and spring. We encourage periodic visits to see our slow, but methodical progress toward a stable grove of Engelmann oak trees for future generations.

—James E. Henrich is Curator of Living Collections at the Arboretum.

Landscape considerations

If you have an Engelmann oaks in your landscape, you may think that just because this oak is native to Southern California it will tolerate all of the climatic vagaries provided by Mother Nature and be plastic enough to adjust. Living Among the Oaks and many other resources recommend that when the annual precipitation is below normal (15”), supplemental deep and thorough monthly watering through spring is advisable. If summer temperatures are above normal (with extended periods of extreme heat), one or two supplemental saturating applications of water are also advisable (in August and/or September). Apply the water well into the drip line and beyond, keeping the water away from the trunks because they concentrate and funnel water directly to the main roots which are most susceptible to Armillaria. And, all pruning should be restricted to the months of July to September.

—J.E.H

Above: Flags mark locations of spontaneous seedlings beneath mature trees on Tallac Knoll. Left: Some of the nearly 700 Engelmann oak seedlings being watered in the nursery.
**WINNER SESSION**

Thursdays, January 12 – March 1; 9:30am–Noon; Palm Room; $100 for the series, $20 per class. Reservations or you may pay at the door. Please note special times for field trips, which are self-driven and require pre-registration.

COMPULSIVE GARDENERS
Fridays, January 6 – February 24
CLASS FULL

ROSE PRUNING
Saturday, January 7; 9am–Noon; Palm Room
$25 members; $30 nonmembers
Instructor: Jill Morganelli
January is a big month for roses; proper pruning and soil building will determine the health and beauty of roses throughout the year.

SQUARE FOOT GARDENING WORKSHOP
Saturday, January 21; 10am–1pm; Education Greenhouse
$25 members; $30 nonmembers
Instructor: Jo Ann Carey
Square foot gardening uses only 20% of the land space of a conventional garden and saves both water and time. Recommended reading: All New Square Foot Gardening by Mel Bartholomew, available in the Arboretum Garden & Gift Shop and Arboretum Library.

COOKING

FRESH: CELEBRATING THE TABLE THE MARKET ON HOLLY WITH MARY PAT BRANDMEYER
Wednesday, January 11; 3–5pm
See page 14 for details.

KIDS & FAMILY

BOOKWORMS: A FREE STORYTELLING PROGRAM: IT BLOOMS EVERY YEAR: ALOES
Wednesday, January 4; 10am
Wednesday, January 18; 10am
Saturday, January 21; 2pm
Main Entrance
Free with admission; members free
Enjoy plant and nature stories and a take-home craft.

ARBRETUM ADVENTURES: LET’S MOVE! ADVENTURE HUNTS
Saturday, January 14; 10am–Noon;
Meet in the Rotunda.
Free with admission; members free
Join your adventure guide as we explore the Arboretum. Come early as space is limited to 25. Children of all ages are welcome!

KIDSART AT THE ARBRETUM
Saturdays, January 21 – March 24;
Noon–1pm; 1:15–2:15pm; 2:30–3:30pm
$155 per session; To register call KidsArt at 818-248-2764
KidsArt teaches drawing so that students have the opportunity to learn fundamental skills. Students learn how to “see” in a new way. KidsArt teaches students how to measure with the eye, how to break something into its parts and put it back together again to make a whole picture.

FAMILY FUN CLASSES: SURVIVOR: THE TROPICS
Saturday, January 28; 10am–Noon;
Meet in the Rotunda
$12 per family for members;
$14 per family for nonmembers;
Pre-registration required.
Your family is vacationing in the tropics having a fun filled adventure when suddenly you and your family have been separated from your group!

IKEBANA
Fridays, January 13 – March 2
ADVANCED: 9:30–11:30am
BASIC: 11:00am–12:30pm
Bamboo Room
$72 members; $87 nonmembers;
$32 materials fee payable instructors
Instructors: Reiko Kawamura and Yumiko Kikkawa
Learn about Japanese cultural traditions in these popular workshops while practicing the techniques of Moribana, Heika and landscape arrangements.

COLLECTIONS

PLANT INFORMATION: SPRING BULBS FOR SOUTHERN CALIFORNIA GARDENS
Wednesday, January 4; 1:30–3pm;
Plant Information Office
Instructor: Frank McDonough
Free with admission; members free
The first Wednesday of each month, the Arboretum’s plant information consultant Frank McDonough will cover different gardening topics and share the most interesting and informative questions received by the Plant Information Department.

READING THE WESTERN LANDSCAPE BOOK CLUB: WHEN THE KILLING’S DONE BY T. CORAGHESSAN BOYLE
Saturday, January 7; 2pm;
Arboretum Library
Free with admission; members free
The Arboretum Library’s book club explores the portrayal of western North American landscape in fiction, nonfiction and poetry.

FITNESS

YOGA IN THE GARDEN
Thursdays, January 5, 12, 19, 26;
9:30–10:45am
$30 members; $35 nonmembers
Instructor: Candyce Columbus
Improve flexibility, balance and strength in the open air surrounded by the beauty of nature in the Arboretum.

ART

USING COLORED PENCILS IN BOTANICAL ART
Tuesdays, January 10, 17, 24, 31;
10am–2pm (includes one-half hour for lunch/3.5 hours of class)
$255 members; $275 non-members per month
Instructor: Cristina Baltayian
The class will focus on techniques, composition and color mixing. All levels of experience are welcome.

A LET’S MOVE! PROGRAM

Pre-registration preferred for all classes; please call 626-821-4623 or email jill.berry@arboretum.org to register.
EVENTS

MUSHROOM FAIR
Sunday, February 12; 9am–5pm; Ayres Hall
Free with admission; members free
The Los Angeles Mycological Society’s Annual Wild Mushroom Fair will feature a special guest speaker and exhibits of wild mushrooms. The event will include demonstrations on how to grow mushrooms and cook them. Professional mycologists will be on site for consultation. There will also be vendors selling mushroom-themed books, posters, kits, T-shirts and art-related objects.

ORCHID SHOW & SALE
Saturday-Sunday, February 25 – 26; 10am–5pm; Ayres Hall
Free with admission; members free
The San Gabriel Valley branch of the Cymbidium Society of America presents cymbidium hybrids, plant displays and orchids for sale and CSA information.

GARDENING

MUSHROOM IDENTIFICATION
Saturday, February 4; 10am-Noon
$25 members; $30 nonmembers
Instructor: Jerrold Turney, Ph.D.
This class will provide a basic overview of the fungal kingdom with emphasis on mushroom identification. Learn the basic characteristics used to identify mushrooms and other fleshy fungi.

PARK FACILITIES (A MT. SAN ANTONIO COLLEGE CLASS HELD AT THE ARBORETUM)
Mondays, February 27 – June 12; 6–10pm; Palm Room
$30 payable to the Arboretum; $75 payable to Mt. SAC
Instructor: Eric Johnson
In this course, you will learn about the management and operation of different types of park facilities, including the management of sports fields, recreation centers, campgrounds, aquatic facilities and golf courses. This is a for-credit class (3 units) offered through Mt. San Antonio College. Students must register through Mt. SAC (www.mtsac.edu) before the class begins. For information, call Mt. SAC at 909-594-5611, x4540.

COOKING

FRESH: CELEBRATING THE TABLE XANH BISTRO CHEF/OWNER HALEY NGUYEN

Saturday, May 26; 9:30am-12:30pm; Palm Room
Instructor: Laramee Haynes
$25 members; $30 non-members
Join Laramee Haynes for a practical talk on saving water in the garden and other sustainable practices. He will help you see the science behind the fashion so you can make good decisions for saving money and helping the environment. www.HaynesLandscaping.com

KIDS & FAMILY

ARBORETUM ADVENTURES: FUN IN THE ROSE GARDEN
Saturday, May 5; 10am–Noon; Rotunda
Free with admission; members free
See page 16 for details.

FAMILY FUN CLASSES: ANCIENT CAVE PAINTINGS
Saturday, May 19; 10am-Noon; Rotunda
$12 per family for members; $14 per family for non-members; Pre-registration required. Please call 626-821-4623 or 626-821-5897.
Did you know that the oldest known paintings were created 35,000 years ago? Cave and rock paintings can be found all over the world, including Southern California, and give us insight into ancient civilizations living long before us. Mix up your own paint using natural pigments and create your own ancient (or modern) narrative, using symbols, patterns and primitive representations on a variety of surfaces.

BOOKWORMS: A FREE STORYTELLING PROGRAM: EAT: THE EDIBLE GARDEN
Wednesday, May 2; 10am
Saturday, May 12; 2pm
Wednesday, May 16; 10am

Thursdays, May 3, 10, 17, 24; 9:30–10:45am
$30 members; $35 nonmembers
Instructor: Candye Columbus
See page 16 for details.

A LET’S MOVE! PROGRAM

Pre-registration preferred for all classes; please call 626-821-4623
or email jill.berry@arboretum.org to register.
**EVENTS**

**DAYLILY SHOW & PLANT SALE**  
Saturday, June 2; 9am–4pm; Ayres Hall  
*Free with admission; members free*  
At the Southern California Hemerocallis and Amaryllis Society’s annual show, you’ll see daylilies in shades of yellow, red, white, salmon, orange, and bi-colors. The show will feature educational displays and demonstrations. Plants will be for sale.

**INTERMEDIATE OBEDIENCE AT THE ARBORETUM**  
Mondays, June 4–July 7; 7pm–8pm; Event lawn  
*$120 General Registration; $100 Arboretum members and PHS adopters; $60 Arboretum PHS and volunteers; Register at www.pasadenahumane.com or call the Behavior and Training Hotline, 626-792-7151, ext. 155.*  
This five-week course allows you and your dog to progress in your training. Discussion and training includes improved leash walking, “leave it”, sending your dog to bed, sitting for petting, prolonged stays, and establishing a more reliable recall. Opportunities will be given for you and your pet to train with higher levels of distractions and distance.

**FERN AND EXOTIC PLANT SHOW AND SALE**  
Saturday – Sunday, June 9 – 10; 9am–4:30 pm; Ayres Hall  
The show will display more than 60 varieties of ferns plus over 70 varieties of other plants, rare species and collectibles. Orchids, bromeliads, cacti, cycads, terrarium plants, begonias and tree ferns will be among the exotic plants featured.

**PASADENA POPS: THEY’RE PLAYING OUR SONG WITH LUCIE ARNAZ AND ROBERT KLEIN**  
Saturday, June 16; 5:30pm picnicking; 7:30pm concert  
*To purchase tickets for the concerts, visit www.pasadenasymphony-pops.org or call 626-793-7172. Arboretum members receive a 10% discount off of regular ticket prices.*  
See page 15 for details.

**ORGANIC FRUIT AND VEGETABLE GARDENING**  
Saturday, June 2; Noon–4pm; Bamboo Room  
*$25 members; $30 nonmembers*  
*Instructor: Jill Morganelli*  
Learn how to grow summer fruits and vegetables organically in your home garden! Vegetable gardens enhance the appearance of any yard and provide a fun activity for all ages. This class focuses on seasonal production and covers a variety of topics.

**DIY—THE GREEN WAY!**  
Saturday, June 30; 10am–Noon; Palm Room  
*$25 members; $30 nonmembers*  
*Instructor: Steve Gerischer*  
Come and learn about do-it-yourself techniques to create an Earth-friendly landscape that uses less water and more sustainable resources.

**KIDS & FAMILY**

**A LET’S MOVE! PROGRAM**
HELP US GROW—BECOME A MEMBER TODAY! Your membership provides free admission to the Arboretum and to over 270 participating gardens around the U.S. and Canada for a full year. You also receive discounts on selected classes, programs and events, as well as on purchases at the Garden and Gift Shop, and at participating nurseries. To become a member, visit www.arboretum.org, or call 626-821-3233.

MEMORIALS & TRIBUTES
Support the Arboretum with a special gift for a loved one. You can celebrate the life of a friend or family member in the garden. To give a gift of a commemorative bench or tree in the garden as a memorial or tribute, please call 626-821-3237.

ESTATE GIFT PLANNING
You can create financial advantages for you and your family by making an estate gift plan that includes the Los Angeles Arboretum Foundation, a tax-exempt charity. By notifying us that you are including the Arboretum in your estate gift planning through a simple will, life insurance or trust, you will become a member of the Samuel Ayres Legacy Society. For more information, please call 626-821-3232.
Thank you to our donors

The Arboretum community is made up of many individuals who share a vision of the vital role the garden plays as a place of learning, inspiration, and enjoyment. We are proud to recognize these special individuals, foundations and corporations who have made contributions. Thank you to all our donors and members for your philanthropic support.

The Arboretum appreciates your support. Listed here are donations received between May 28 – November 23, 2011. Please call the Development Office at 626-821-3237 and let us know if we inadvertently misspelled or omitted your name.
GET INVOLVED
Volunteers provide hospitality, information and support staff in all areas of the garden. For more information about becoming a volunteer, contact Nancy Carlton at 626-802-8471 or nancy@arboretum.org.

BECOME A DOCENT
No experience is necessary—just enthusiasm for plants, history and an eagerness to learn and share the knowledge. Docents are needed to lead both adult and school tours. As a docent, you will spend time learning about the Arboretum’s collections and local California history. Becoming a docent is a great way to meet new friends and become an integral part of the garden.

GETTING HERE
The Arboretum is located in the city of Arcadia, just 2 miles east of Pasadena. Exit off the 210 Freeway on Baldwin Avenue and travel south. We are also accessible by Metro (www.metro.net). Bicycle racks are available in the parking lot. Parking is free. Handicapped parking is available.

PEACOCK CAFÉ
Tuesday – Sunday; 9am–4:30pm
The Fresh Gourmet staffs the Peacock Café and offers a varied selection of gourmet sandwiches, wraps, salads and special items from the grill. No picnics are allowed on the Arboretum grounds, but picnic tables are available outside the main entrance. For large parties and catering, call 626-446-2248.

HOURS AND ADMISSION
Open daily from 9am–4:30pm (Members enter at 8am);
$8 General Admission; Members Free
$6 Seniors, Full-time students
$3 Children 5 – 12
$4 Tram Ride

GARDEN & GIFT SHOP
OPEN DAILY FROM 9AM – 4:30PM
