

Do Nature and History walks inspire you?

Would you like to share your joy with youth and adults visiting the LA Arboretum?

Our Docents are the stewards of our gardens for thousands of visitors each year. Their tours inspire deep curiosity and a love of nature and local history.

We offer unique tours in all fields of interest:

School Tours:

Plants of our World: We tour the grounds to see examples of plants from different environments, noting the structure of plants, their function, and adaptations as appropriate for the grade level.

Early California History: We visit historic areas on site to learn about the Tongva Native Americans, the Rancho Period, and the Baldwin Era.

Adult tours: Our docents give visitors a tour of the Arboretum, customized to their interests.

For the opportunity to deepen your knowledge of the Arboretum and help students connect with nature and local history, ask about the

Once a Year Docent Training, starting October 2nd :
